In calculating the level of the Balanced Asset 10 index and level of the Balanced Asset 5 index, the index methodology deducts a maintenance fee of 0.85% per year, calculated daily. This fee will reduce the level of each Index and thus the amount of interest, if any, that will be credited to any Product. Furthermore, while the volatility control applied by CIBC as part of the index methodology may result in less fluctuation in rates of return as compared to indexes without volatility controls, it may also reduce the overall rate of return for products referencing one of the Indexes as compared to other indexes not subject to volatility controls.
