

F&G SecureBuilder™ Series — Statement of Understanding

Fidelity & Guaranty Life Insurance Company
801 Grand Ave, Suite 2600 Des Moines, IA 50309
888.513.8797 | fglife.com

Thank you for your interest in the F&G SecureBuilder Series annuity from Fidelity & Guaranty Life Insurance Company (“Company”). We want you to understand the benefits, features, and limitations of this annuity before you purchase it. This Statement of Understanding summarizes the annuity Policy (“Policy”) for the SecureBuilder Series.

We organized the document to explain three important points — how you can put money into the account, how your money grows or diminishes in the account, and how you can receive money from the account when you need it. We also provided certain information about the insurance producer and other parties involved in product distribution.

Please read this document thoroughly, then sign the last page which is a disclosure form acknowledging your understanding of the Policy. If you decide to purchase the SecureBuilder Series annuity, we will send you the actual Policy. If the content in this Statement of Understanding differs from what you read in any provision of the Policy, the Policy controls. If the content in this Statement of Understanding differs from what you read in the consumer product brochure, this document controls.

What is the F&G SecureBuilder Series annuity?

F&G SecureBuilder Series is a Flexible Premium Fixed Indexed Deferred Annuity. The Policy is primarily intended for customers seeking a long-term retirement savings vehicle.

What are the guidelines for premium deposits?

Your initial premium deposit is the first sum of money you pay. It must be at least \$10,000. Any additional premium deposits must be at least \$2,000. We reserve the right to review anything over \$1,000,000. You must make your premium deposits prior to the maturity date.

When will my annuity be issued?

We issue annuities with an effective date of the 1st, 8th, 15th or 22nd of the month. We hold your premium deposits without interest until the next available effective date. Your Policy anniversary is the date we deposit your funds into your elected interest crediting option, which is also the first day that your funds may begin accruing interest. Special rules apply if one of these dates falls on a weekend or holiday. If you withdraw money from an interest crediting option on any day other than a crediting option anniversary, you will not earn indexed interest, if any, on the amount you withdraw. If you make premium deposits, they are held without interest until the next available effective date.

What if I decide I do not want my Policy after it is delivered?

The free look period is shown on the cover page of your Policy. After you receive the Policy, you may return it within the free look period which is the amount of time you have to request an unconditional refund of the premium you deposited.

How much interest will be credited to my Policy?

The amount of interest credited to your Policy depends on options you select. You choose the various accounts you want your money to be invested in. The accounts you choose from offer a variety of interest crediting options, and there are essentially two types — fixed interest crediting and indexed interest crediting. The account value equals the sum of the account values — the fixed interest crediting option account value and the indexed interest crediting option account value.

Each crediting option account value equals

- all premiums allocated thereto, plus any interest credited thereon;
- less any amounts previously withdrawn including any applicable surrender charges and market value adjustments thereon;
- less any applicable rider charges;
- plus any adjustments for reallocations.

Can I control the amount of interest my Policy earns by reallocating my money?

Account values either grow based on the fixed interest crediting option or potentially grow based on the indexed interest crediting options. You may choose any one or combination of these interest crediting options subject to the Policy's reallocation provisions.

For the fixed interest crediting option, you must request reallocation at least two days prior to the Policy anniversary. For the indexed interest crediting option, you must request reallocation at least 30 days prior to the start of a new index crediting period. Also, you may only reallocate values among interest crediting options once per Policy year, and those reallocations become effective on different days depending on the option. Fixed interest crediting option reallocations become effective on the next Policy anniversary. Indexed interest crediting option reallocations become effective on the next index crediting period.

Note that after the initial premium, any additional premium will be automatically allocated to the fixed interest crediting option account value and will remain there unless you reallocate it.

What is the fixed interest crediting option?

When you choose this interest crediting option, we declare an initial fixed interest rate and renewal fixed interest rates that will determine the fixed rate of interest credited to your account. These rates will never be less than the guaranteed minimum effective annual interest rate of 1.00%. Interest credits are credited daily. The initial fixed interest rate is guaranteed for the first Policy year only. At the end of the first Policy year, we will declare a renewal fixed interest rate that will be guaranteed for one Policy year only. Subsequent years will follow the same pattern.

What are indexed interest crediting options?

You can choose from several different indexed interest crediting options. Each option has an account name. When you choose one of these indexed interest crediting options, the index credits are based on the performance of the selected option and will never be less than zero. Below are the choices.

S&P 500® Index Accounts

- **One-Year Annual Point-to-Point with a Cap and Participation Rate** — In this indexed interest crediting option, we base the value of your index credits on the percentage change in the S&P 500® from the previous Policy anniversary to the current Policy anniversary, multiplied by the participation rate, and then subject to the cap. The cap rate is guaranteed for one Policy year and is subject to change annually. The cap rate will never be less than 1.00% for this crediting option. The participation rate will never be less than 100% for this indexed interest crediting option.
- **Two-Year Annual Point-to-Point with a Cap and Participation Rate** — In this indexed interest crediting option, we base the value of your index credits on the percentage change from beginning and ending values of the S&P 500® Index during a 2-year period, which cannot be greater than the cap rate. The cap rate and participation rate are guaranteed for each 2-year indexing period and are declared prior to each two-year indexing period. The cap rate will never be less than 2.00% and the participation rate will never be less than 100.00%. This 2-year indexed interest crediting option is not available if your Policy is issued in the state of New Hampshire.
- **One-Year Point-to-Point with a Participation Rate** — In this indexed interest crediting option, we base the value of your index credits on the percentage change in the S&P 500® Index from the policy anniversary beginning 1-year indexing period to the current Policy anniversary, multiplied by the participation rate. The participation rates are guaranteed for each 1-year indexing period and are declared prior to each 1-year indexing period. The participation rate will never be less than 10.00%.
- **One-Year Performance Trigger (also referred to as One-Year Point-to-Point Declared Rate on Index Gain)** — In this indexed interest crediting option, we base the value of your index credits on the percentage change in the S&P 500® from the previous Policy anniversary to the current Policy anniversary. If the percent change is zero or negative, no index credits are added. If the percent change is positive, the declared index gain interest rate is used to determine the index interest credits. The minimum index gain interest rate for this indexed interest crediting option is 1.00%.

CIBC Balanced Asset 5 Index (CIBQB05E) Accounts

The index credits for this indexed interest crediting option are based on the CIBC Balanced Asset 5 Index (BA5 Index). The BA5 Index aims to maximize potential returns for a given level of risk by leveraging a 60/40 portfolio allocation of equity and bond exposure. In addition, the BA5 Index offers rebalancing and volatility control features. More specifically, while targeting a volatility of 5.00%, the index tracks the value of a portfolio consisting of cash and two specific Blackrock ETFs — iShares Core S&P 500® ETF (IVV) and iShares 20+ Year Treasury Bond ETF (TLT). The 60/40 allocation refers to IVV at 60 and TLT at 40. The index is rebalanced monthly to 60/40 weights.

The Blackrock iShares Core S&P 500® ETF tracks the investment results of an index composed of large-capitalization U.S. equities. Its representative sample of securities has an investment profile similar to that of the S&P 500® Index.

The Blackrock iShares 20+ Year Treasury Bond ETF tracks the investment results of an index composed of U.S. Treasury bonds with remaining maturities greater than 20 years. The index deducts a maintenance fee of 0.85% per annum, calculated daily.

You have three options to choose from if you are interested in the BA5 Index accounts.

- **One-Year Point-to-Point with a Participation Rate** — In this indexed interest crediting option, we base the amount of your index credits on the percentage change in the CIBC Balanced Asset 5 Index from the Policy anniversary beginning 1-year indexing period to the current Policy anniversary, multiplied by the participation rate. The participation rates are guaranteed for each 1-year indexing period and are declared prior to each 1-year indexing period. The participation rate will never be less than 40.00%.
- **Two-Year Point-to-Point with a Participation Rate** — In this indexed interest crediting option, we base the amount of your index credits are based on the percentage change in the CIBC Balanced Asset 5 Index from the Policy anniversary beginning 2-year indexing period to the current Policy anniversary, multiplied by the participation rate. The participation rates are guaranteed for each 2-year indexing period and are declared prior to each 2-year indexing period. The participation rate will never be less than 55.00%. This 2-year indexed interest crediting option is not available if your Policy is issued in the state of New Hampshire.
- **One-Year Performance Trigger (also referred to as One-Year Point-to-Point Declared Rate on Index Gain)** — In this indexed interest crediting option, we base the amount of your index credits on the percentage change in the CIBC Balanced Asset 5 Index from the previous Policy anniversary to the current Policy anniversary. If the change in the index is positive, the declared index gain interest rate is multiplied by the index interest crediting option's account value to determine the index credits. The minimum index gain interest rate for this index interest crediting option is 1.75%.

The following statements are true for all of the BA5 Index accounts.

- The rationale of the index may prove to be unsuccessful. The index uses historical volatility to predict future returns and future volatility. If historical volatility proves to be a poor measure of predicting future returns or future volatility, the index portfolio may perform poorly and may underperform alternative portfolios selected using a different methodology.
- The index may not achieve its intended objectives of keeping the target volatility level for the index approximately equal to 5.00%.
- The index has limited actual history and may perform in an unanticipated manner.
- The daily level of the index reflects the deduction of a maintenance fee of 0.85% per annum. Because of this deduction, the value of the index will be less than the value of a hypothetical, identically constituted portfolio from which no fees are deducted.
- Because the index will be invested in only one or a small number of index components, it may produce lower returns than an investment in a more diversified pool of assets.
- Any exposure to cash in the portfolio will earn no return. In addition, if the volatility control mechanism causes exposure to the index portfolio to be less than 100%, the difference will be uninvested and will earn no return.
- The performance of the index will be subject to risks associated with investments in ETFs.
- Publicly available information on this index and its methodology is limited.
- The investment performance of the CIBC Balanced Asset 5 Index does not directly pass through to you as an investment. You will not receive dividends off the CIBC Balanced Asset 5 Index.

What else should I know about index interest credits?

When the declared participation rate is greater than 100%, and the index change percentage at the end of the index term is zero or negative, no index interest credits will be applied to the account value. When you make withdrawals on any day other than an interest crediting option anniversary, the amount withdrawn will not be credited with any index interest credits in the current index crediting period.

Will I receive dividends in my annuity?

The investment performance of the S&P 500® Index and CIBC Balanced Asset 5 Index (collectively referred to as the indices) does not directly pass through to you as an investment. You will not receive dividends off the indices. The SecureBuilder annuity uses the performance of external indices to calculate any applicable index credits to determine your credited interest, but your premiums are not actually invested in the indices.

How will my annuity perform during market volatility?

The CIBC Balanced Asset 5 Index contains a volatility control feature. Volatility control seeks to provide smoother returns and mitigate sharp market fluctuations. Your SecureBuilder annuity can benefit from the volatility control feature during market downturns. However, your annuity may not benefit from market upturns because the methodology for CIBC Balanced Asset 5 Index may prove to be unsuccessful. This index uses historical volatility to predict future returns and future volatility. If historical volatility proves to be a poor measure of predicting future returns or future volatility, the index portfolio may perform poorly and may underperform alternative portfolios selected using a different methodology. The CIBC Balanced Asset 5 Index has limited actual history and may perform in an unanticipated manner.

Indexed interest crediting options may vary by firm.

What are the terms I need to understand before I continue reading about the various ways I receive payments or make withdrawals from my SecureBuilder Series annuity?

- The **maturity date** is the date your Policy starts annuity payments without penalties.
- The **surrender date** is the date you surrender your Policy.
- The **surrender value** is the value available to you on the date you surrender your Policy.
- The **surrender charge** is the cost you incur if you surrender the Policy or if you make a withdrawal which exceeds the penalty free withdrawal amount during the period the surrender charge schedule is in effect.
- The **annuitant** is the person on whom the annuity payments are based.

Do I have access to my policy value before the Maturity Date?

You certainly do have access to your Policy before the maturity date. We offer several penalty free withdrawal options that are available to you in specific health and health care situations. However, outside of those specific health care situations, any values you choose to access during the first 10 Policy years may be subject to a surrender charge and an MVA.

Will my withdrawals be taxed?

Withdrawals from your annuity may be taxable and may result in a tax penalty for those under the age 59 ½. Please consult with a tax advisor prior to utilizing any provisions.

What are the provisions for a penalty free withdrawal?

In the first Policy year, all withdrawals will be subject to a surrender charge and MVA. After the first Policy year, and prior to the end of the 5th or 7th Policy year depending on the term, you can withdraw up to 10.00% of the account value without a surrender charge and MVA. Remember, the account value is the account value as of the prior Policy anniversary less any penalty free withdrawals taken during the current Policy year. Also, no surrender charges or MVA will apply after the end of the 5th or 7th Policy year depending on the term.

If you withdraw less than the penalty free withdrawal amount in any Policy year, your penalty free withdrawal amount in future Policy years will not be increased.

Another factor to consider in your understanding of the penalty free withdrawal riders is that required minimum distributions are penalty free for all Policy options with or without a rider. Those required minimum distributions under the Internal Revenue Code attributable to your Policy are part of and not in addition to the penalty free withdrawal amount. Please refer

to the IRA Disclosure Statement for additional information on required minimum distributions.

In addition to the penalty free withdrawal, we have defined three specific health care situations which allow for penalty free withdrawal. We call them Terminal Illness Rider, Nursing Home Rider and Home Health Care Rider. If you qualify for one of these Riders, surrender charges and MVA will not apply to the amounts you withdrawal from your account.

What are the specific penalty free withdrawal benefits under the Terminal Illness Rider?

If you, as the Policy owner, have an illness or physical condition that results in your having a life expectancy of 12 months or less, you may qualify for the Terminal Illness Rider. With this rider, you may withdraw all or part of your account value without a surrender charge and MVA (where applicable). If on full surrender, the minimum guaranteed surrender value is greater than the account value, you will receive the minimum guaranteed surrender value. There is no additional charge for the Terminal Illness Rider.

You qualify for the Terminal Illness Rider:

- if your terminal illness is diagnosed at least one year after the Policy's date of issue,
- if written proof of your terminal illness is received at our home office, and
- if the written proof includes, but is not limited to, certification by a physician who provides medical care to you in connection with your terminal illness.

Please note that we reserve the right to obtain an optional second medical certification by another physician selected by the Company and obtained at the Company's expense.

If your Policy is issued in the state of Kansas, the qualifying conditions are slightly different: You qualify for the Terminal Illness Rider if you, as the Policy owner, have an illness or physical condition that results in your having a life expectancy of 24 months or less, and if the terminal illness is diagnosed at least 90 days after the Policy's date of issue.

What are the specific penalty free withdrawal benefits under the Nursing Home Rider?

If you, as the Policy owner, become confined to a state-licensed, nursing long-term care facility that provides skilled, continuous nursing care or services under the supervision of a licensed nurse or physician, you may qualify for the Nursing Home Rider. With this rider, you may withdraw all or part of your account value without a surrender charge and MVA (where applicable). If on full surrender, the minimum guaranteed surrender value is greater than the account value, you will receive the minimum guaranteed surrender value.

There is no additional charge for the Nursing Home Rider. It is not available if your Policy is issued in the state of Massachusetts.

You qualify for the Nursing Home Rider

- if your confinement to a nursing home begins at least one year after the Policy's date of issue,
 - In the states of Alaska, Alabama, Connecticut, Minnesota, Mississippi, Oregon, Pennsylvania and Washington confinement may begin after the Policy's date of issue.
- if your confinement has continued for at least 60 consecutive days,
- if written proof of your confinement is received at our home office, and
- if the written proof includes certification by a licensed nurse or physician who provides care services to you, and
- if your withdrawal is made while you are confined.

What are the specific penalty free withdrawal benefits under the Home Health Care Rider?

If you, as the Policy owner, are unable to physically care for yourself without the assistance of another person, you may qualify for the Home Health Care Rider. This rider includes specific definitions about your physical self-care abilities. The critical measurement of your abilities is the prevention of injury without physical intervention.

To determine your need for care, we lay out six activities of daily living. If you need another person within arm's reach to help you with at least two out of the six activities in order to prevent injury, then we consider you unable to physically care for yourself.

Your home health care services for at least two out of the six activities of daily living must be received in your personal residence from a licensed home health care agency or provider. Care providers include, but are not limited to, part-time

and intermittent skilled nursing services, home health aid services, physical therapy, occupational therapy, speech therapy, audiology services, and medical social services by a social worker.

The six activities of daily living are

- **bathing** — washing oneself in either a tub or shower, including the tasks of getting into and out of the tub or shower, or washing oneself by sponge bath;
- **dressing** — putting on and taking off all items of clothing and any required braces, fasteners, or artificial limbs;
- **transferring** — moving into and out of a bed, chair, or wheelchair;
- **toileting** — getting to and from the toilet, getting on and off the toilet, and performing related personal hygiene;
- **continence** — ability to maintain control of bowel or bladder function, or ability to perform personal hygiene related to using a catheter or colostomy bag; and
- **eating** — feeding oneself by getting food into the body from a receptacle (such as cup, plate, or table) or by feeding tube or intravenously.

With this rider, you may withdraw all or part of your account value without a surrender charge and MVA (where applicable). If on full surrender, the minimum guaranteed surrender value is greater than the account value, you will receive the minimum guaranteed surrender value.

There is no additional charge for the Home Health Care Rider. It is not available if your Policy is issued in the state of Massachusetts or Idaho.

You qualify for the Home Health Care Rider benefit:

- if you are unable to perform at least two of the six activities of daily living; and
- if your impairment has continued for at least 60 consecutive days; and
- if written proof of your impairment and services is received at our home office; and
- if the written proof articulates which of the six activities of daily living you are unable to perform; and
- if the written proof includes certification by a licensed care provider who provides care related to your impairment; and
- if your impairment related to the activities of daily living begins at least one year after the Policy date of issue; and
 - In the states of Alaska, Alabama, Connecticut, Minnesota, Mississippi, Oregon, Pennsylvania and Washington confinement may begin after the Policy's date of issue.
- if your impairment is expected to last at least 90 days from the date of request; and
- if your surrender or withdrawal is made while you are receiving home health care services related to your impairment.

What is the death benefit provision?

If the owner dies before the Maturity Date, the ownership of the Policy passes to the person(s) living in the order as follows:

- surviving joint owner, if any;
- beneficiary;
- contingent beneficiary;
- estate of the last owner to die.

If the spouse of the first owner to die elects to continue the Policy, we will continue to apply surrender charges and MVA, where applicable. In that case, we do not calculate a partial index interest credit. We call this the spousal continuation provision.

If a spousal continuation does not apply or is not invoked, the Policy must be fully surrendered and the entire proceeds must be distributed within five years of the owner's death. However, within one year from the date of the death, a non-spouse may elect to begin receiving payments with respect to their proportionate share, provided such payments are distributed over the life or a period not to exceed the life expectancy of the non-spouse. With the death benefit, we deduct no surrender charge or MVA. The surrender value will equal the total account value. If on full surrender, the minimum guaranteed surrender value is greater than the total account value, the beneficiary of the Policy recipient will receive the minimum guaranteed surrender value.

For the death benefit provision, on the date of death we calculate a partial index interest credit under applicable indexed

interest crediting options as if the date of death was on an index crediting date. After performing such calculation and crediting any applicable index interest credits, all index interest crediting will stop, and the fixed interest option rate will apply until the date of full surrender. A partial index interest credit, if any, will be calculated and credited under applicable indexed interest crediting options as if the date of death was on an index crediting date. After performing such calculation and crediting any applicable index interest credits, all index interest crediting will stop, and the fixed interest crediting option rate will apply until the date of full surrender.

If the spouse of the first owner to die elects to continue the Policy, surrender charges and market value adjustment will continue to apply. Additionally, no partial index interest credit calculation will occur.

What happens on the Policy's maturity date?

On the Policy's maturity date, you will begin to receive the entire value of your Policy in the form of annuity payments. There are a number of payout options. After you select an option and the amount of your annuity payments is determined, those payment amounts are guaranteed and can never be changed. You should review the available payout options with your tax advisor to select the most appropriate one based on your financial situation.

What if I decide to surrender my Policy prior to the maturity date?

If you surrender your Policy prior to the maturity date, the Company will pay you the Policy's surrender value. The surrender value is equal to the greater of the following values:

- the vested account value, less any applicable surrender charges, plus/minus any applicable market value adjustment; or
- the minimum guaranteed surrender value (MGSV).

What is a minimum guaranteed surrender value (MGSV)?

At any time before the maturity date, the minimum guaranteed surrender value equals

- 87.50% of the premiums,
- plus interest credited daily at the MGSV accumulation interest rate,
- less any amounts previously surrendered from the minimum guaranteed surrender value accumulated at the MGSV accumulation interest rate.

What is a MGSV accumulation interest rate?

The MGSV accumulation interest rate is a rate between 1.00% and 3.00%, which is declared on your Policy information page and is guaranteed for the life of the Policy.

What is a surrender charge?

A surrender charge is the cost you incur if you surrender the Policy or if you withdraw an amount which exceeds the penalty free withdrawal amount during the period the surrender charge schedule is in effect. We apply the surrender charge at the time of the surrender or withdrawal. Using the surrender charge schedule, we multiply any amount you withdraw by the applicable percentages on the schedule.

Surrender Charge Schedule for the SecureBuilder 5

Policy Year	1	2	3	4	5	6
Percentage	9%	8%	7%	6%	5%	0%

Surrender Charge Schedule for the SecureBuilder 7

Policy Year	1	2	3	4	5	6	7	8
Percentage	9%	8%	7%	6%	5%	4%	3%	0%

For Florida and Texas, surrender charges are waived after the maturity date and when lifetime withdrawals begin. If you wish to forgo lifetime payments and withdraw the full account value as a lump sum, applicable surrender charges are applied.

F&G SecureBuilder™ Series — Statement of Understanding

Fidelity & Guaranty Life Insurance Company

Would it ever occur that the surrender value is less than the premiums I have paid in?

If you surrender your Policy before the end of the 10th Policy year, you may receive less than your premium.

The following chart shows hypothetical surrender charges to demonstrate sample surrender charges.

Policy Year	Hypothetical Account Value	Penalty Free Withdrawal	Surrender Charge Percentage	Surrender Charge	(1) Account Value less Surrender Charge	(2) Minimum Guaranteed Surrender Value	Surrender Value = Greater Value of (1) Or (2)
1	\$100,000	\$0	12%	\$12,000	\$88,000	\$87,500	\$88,000
5	\$104,000	\$10,400	8%	\$7,488	\$96,512	\$91,053	\$96,512
10	\$110,000	\$11,000	3%	\$2,970	\$107,030	\$95,697	\$107,030
20	\$150,000	\$150,000	0%	\$0	\$150,000	\$105,710	\$150,000

Surrender charge percentages are based on a hypothetical surrender charge schedule. Refer to your Policy for the surrender charge percentage applicable each Policy year in the state where your Policy was issued.

The surrender value in this example does not account for any applicable market value adjustment. Application of a market value adjustment may increase or decrease the surrender value. Refer to your contract for market value adjustment details.

What is a market value adjustment?

A market value adjustment (MVA) is a change we make to your total account value in two withdrawal situations —if you surrender your Policy or if you make a withdrawal that exceeds the penalty free withdrawal amount. The MVA is not the surrender charge. But it does effect the surrender value. It is a separate calculation designed to accommodate changes in the market since the date you purchased your annuity.

Remember that your premiums are not directly invested in the market, but we do use the market as an indicator for crediting interest to your account. We calculate the MVA using fluctuations in the market, so the change can, at times, increase or decrease the amount of money withdrawn or surrendered.

Generally, if rates have risen since you purchased your annuity, the MVA will decrease your surrender value; and if rates have fallen, the MVA will increase your surrender value. The net total of all MVA and surrender charges will never reduce the surrender value to an amount which is less than the MGSV. If the MVA results in an increase to the surrender value, the amount of the increase will not be greater than the amount of the remaining surrender charge.

The MVA is based on a formula that takes into account changes in rates between the date of your first Policy premium payment and the date of the withdrawal. Rates are based on the Bloomberg Barclays U.S. Aggregate Index Yield to Worst. We multiply the amount of the account value withdrawn or applied to an annuity option that is subject to the MVA by the market value adjustment factor. The market value adjustment factor is equal to:

$$1 - \left(\frac{A+1}{1+B+.0025} \right)^{N/12}, \text{ where:}$$

- A is the rate determined as of the Policy date of issue;
- B is the rate determined as of the date we process the surrender or annuitization request; and
- N is the number of months remaining to the end of the surrender charge schedule, rounded up to the next higher number of months.

The net total of all MVA and surrender charges will not reduce the surrender value to an amount which is less than the minimum guaranteed surrender value.

A positive MVA will decrease the surrender value, and a negative MVA will increase the surrender value.

If your Policy is issued in the state of Alaska, Alabama, Connecticut, Illinois, Minnesota, Missouri, Mississippi, Oregon, Pennsylvania, and Washington an MVA does not apply.

If your Policy is issued in the state of Indiana, Maryland, and Ohio, the .0025 factor in the MVA Formula in the above example does not apply.

F&G SecureBuilder™ Series — Statement of Understanding

Fidelity & Guaranty Life Insurance Company

If your Policy is issued in the state of California, New Jersey, Utah, and Virginia rates are based on the U.S. Treasury Constant Maturity Series.

What is the market value adjustment limit?

The MVA limit is the largest amount (positive or negative) that will apply to surrender request. The MVA limit equals $W \times$ (the lesser of E or F) where:

- W is the greater of zero or (C/D)
 - C is the portion of the withdrawal that exceeds the penalty free amount
 - D is the account value less the penalty free amount
- E is the account value minus the surrender charge applicable on a full surrender minus the minimum guaranteed surrender value, but not less than zero
- F is the surrender charge applicable on a full surrender

If your Policy is issued in the state of California, New Jersey, Utah, or Virginia, there is no MVA limit.

The following are examples of both a negative and a positive market value adjustment.

Rate Decreases from 3.00% to 2.00%

Rate at Issue (A)	3.00%
Premium	100,000

Surrender Charge	4,950.00
MVA	4,950.00
Surrender Value	100,100.00

*MVA in CA, NJ, UT, and VA would be 5,794.62 and the resulting Surrender Value will be \$99,255.38.

Are there any tax consequences if I take withdrawals from my Policy?

Income tax on interest credited to an annuity is deferred until withdrawals are taken. When you surrender, take a withdrawal from your Policy, or take a Guaranteed Withdrawal Payment from your Policy, you may be subject to federal and state income tax on a portion or the entire amount withdrawn. In addition to income tax, you may be subject to a 10% federal penalty tax before age 59 ½. When annuity payments are elected, a portion of each payment will be taxable and a portion will be treated as a non-taxable return of the Policy's cost basis. Distributions from a qualified annuity (e.g. IRA, 401(k), etc.) may also be taxable. You should consult with a tax advisor or attorney regarding the applicability of this information to your own situation.

What are non-guaranteed elements?

Your annuity contains certain elements which are not guaranteed at issue and may be changed at future points in time at the Company's discretion. Many of these non-guaranteed elements are explained in detail in the Statement of Understanding. These non-guaranteed elements may also be explained in the Policy illustration you may have received from your agent.

- For the fixed interest crediting option, the Company declares the interest rate annually which can never be less than the stated guaranteed rate.
- For other indexed interest crediting options described above the company may change participation rates, cap rates and spreads within stated ranges on an annual or less frequent basis.
- If your annuity has a Guaranteed Minimum Withdrawal Benefit, a restart option may be available in which case the company may change the rollup rate and rider charges within stated ranges.

How is the insurance producer compensated?

The insurance producer is paid commission for selling the annuity. The commission is a percentage of Policy premium and paid as a lump sum or series of payments to the insurance producer. Additional commission called an override is paid by the Company to intermediary agencies or other third parties such as Independent Marketing Organization (IMOs) who assist in recruiting, training, and supporting insurance producers. Insurance producers may also qualify for and receive additional incentives, benefits, or services from the Company, IMOs, or other third party agencies involved in product distribution including but not limited to provision of or reimbursement for training, education, marketing, and advertising; travel and lodging for events and conferences; gifts, meals, and entertainment customary to the business; loans or other financial arrangements; supplemental commission; participation in profit sharing or bonus programs. Eligibility for such incentives, benefits, or services may be contingent on the insurance producer meeting certain sales production goals. The Company provides similar incentives to agencies, IMOs, and other third parties involved in product distribution which may also include increased override amounts when certain sales thresholds are met and in some cases payment of product development fees to IMOs or their affiliates in connection with specific products. The amount of commission or other compensation paid to insurance producers or other parties involved in distribution varies by product. All commissions and other forms of compensation described here are paid by the Company or the agencies, IMOs, or other third parties involved in product distribution and are not deducted from premium paid for the Policy; however, commissions and compensation are cost factors that impact product pricing and features.

What material conflicts of interest might affect the annuity recommendation?

In general, a material conflict of interest exists if the insurance producer has his or her own financial interest in the sale of the annuity that could reasonably be expected to influence the impartiality of the recommendation. The following interests and relationships among others may affect the insurance producer's recommendation of the annuity:

- The insurance producer is an appointed insurance agent for the Company.
- The insurance producer is an independent agent who may represent more than one insurance company but can only represent insurance companies to which he or she is appointed.
- The insurance producer receives a commission when you buy the annuity which varies based on factors such as annuity type, annuity duration, and amount of premium.
- The insurance producer may be eligible for and receive other incentives as described above from the Company or from an IMO or other third party involved in product distribution.
- The insurance producer offers a limited range of products based on his or her license and the menu of available products offered by insurers to which the insurance producer is appointed.
- The insurance producer is compensated only if you purchase the annuity and not compensated if you choose not to buy the annuity.
- The insurance producer compensation could be more or less than compensation paid to an agent or broker offering alternative products or services.
- The insurance producer may have business relationships with IMOs or other third parties providing wholesaling, administration, marketing, or other related services.

It is possible the insurance producer may have other material conflicts of interest. In some cases, depending on applicable laws and regulations, the insurance producer may be required to disclose material conflicts of interest as defined by those laws and regulations. In all cases you may inquire of the insurance producer whether other material conflicts exist. It should be noted that if the insurance producer acts in another capacity in addition to insurance producer (e.g., investment adviser, fiduciary, attorney), additional duties and obligations governing such professions may apply.

What other important information should I know about my Policy?

- The guarantees provided by annuities are subject to the stability and claims paying ability of Fidelity & Guaranty Life Insurance Company and are NOT FDIC insured, are subject to investment risks, including interest-rate risk, and may experience loss of principal.
- If this annuity is being purchased to replace an existing life insurance Policy or annuity Policy, you should compare the two products carefully. You should consider any surrender charges and/or market value adjustments or recapture charges that may be incurred on the surrender of the existing Policy.
- Tax-deferral offers no additional value if the annuity is used to fund a qualified plan, such as an IRA or 401k and may not be available if the owner of the annuity is not a natural person such as a corporation or certain types of trusts.
- It is within the Company's sole discretion to set the interest rates, cap rates, spread rates and participation rates for this annuity, subject to any minimum or maximum guarantees contained in the Policy.
- The Company makes money in various ways including without limitation through investments and Policy charges. The Company seeks to maximize investment income spread which is the difference between overall investment earnings and its obligation to pay Policy benefits. The Company also earns money based on policyholder fees and charges in accordance with terms of the respective Policies.
- This product is offered on a group or individual basis as determined by state approval.
- For group Policies, terms and conditions are set forth in the group certificate and master Policy and are subject to the laws of the state in which they were issued.
- Withdrawals in excess of the penalty free withdrawal amount may be subject to surrender charges and market value adjustments.
- Past performance of a market index is not an indication of future performance.
- The Company's insurance producer may not make any statements that differ from what is stated in this disclosure form or the applicable product brochure. No promises or assurances have been made about the future values of any non-guaranteed elements of the annuity.
- This Policy may be returned within the free look period (of no less than 20 days after you receive it) for an unconditional refund if you are dissatisfied with the Policy for any reason.

A Glossary of Terms for the SecureBuilder Series

annuitant — The person on whom the annuity payments are based.

market value adjustment — Your annuity is subject to a market value adjustment (MVA) during the first 10 Policy years. The MVA is applied on an amount surrendered or withdrawn that exceeds the penalty free withdrawal amount. An MVA may be positive or negative. MVA is not applicable if your Policy is issued in the state of Alaska, Alabama, Connecticut, Illinois, Minnesota, Mississippi, Missouri, Oregon, Pennsylvania and Washington. The MVA is summarized in more detail above in the section about withdrawing your money which begins with the heading “What should I know market value adjustment?”

maturity date — The date your Policy starts annuity payments without penalties.

minimum annual interest rate — For the fixed interest option, the interest rate can change each year and is guaranteed never to be less than 1.00%.

spousal continuation provision — If the spouse of the first Policy owner to die elects to continue the Policy, we will continue to apply surrender charges and MVA. In that case, we do not calculate a partial index interest credit.

surrender charge — Your annuity is subject to a surrender charge during the first 10 Policy years. A surrender charge is the cost you incur on an amount surrendered or withdrawn that exceeds the penalty free withdrawal amount available under your annuity. The surrender charge is described in your annuity and summarized above under the heading “What is a surrender charge?” The surrender charge is applied at the time of the surrender or withdrawal and is calculated by multiplying the applicable percentage shown in the tables in the surrender charge section by the amount withdrawn in excess of the penalty free withdrawal amount.

non-natural owner — a non-natural owner is any trust, corporation, or entity that is not an individual. Non-natural ownership does not include joint owned accounts including more than one owner.

Disclosures:

“F&G” is the marketing name for Fidelity & Guaranty Life Insurance Company issuing insurance in the United States outside of New York. Life insurance and annuities issued by Fidelity & Guaranty Life Insurance Company, Des Moines, IA.

The Balanced Asset 5 Index™ (the “Index”) is the exclusive property of Canadian Imperial Bank of Commerce (Canadian Imperial Bank of Commerce, together with its affiliates, “CIBC”). CIBC has engaged Bloomberg Finance L.P. (“Bloomberg”)

to maintain and to make certain calculations related to the Index. “Canadian Imperial Bank of Commerce”, “CIBC”, and “Index” (collectively, the “CIBC Marks”) are trademarks or service marks of CIBC. CIBC has licensed use of the CIBC Marks to Fidelity & Guaranty Life Insurance Company (“FGL”) for use in one or more fixed indexed annuities offered by FGL (the “Product(s)”). CIBC is not the issuer of the Products and its sole contractual relationship with FGL is to license the Index and the CIBC Marks to FGL.

CIBC developed the Index without considering the needs of FGL or any annuitant. None of CIBC, Bloomberg, or any other third-party licensor (collectively, the “Index Parties”) to CIBC is acting, or has been authorized to act, as an agent of FGL or has in any way sponsored, promoted, solicited, negotiated, endorsed, offered, sold, issued, supported, structured or priced the Products or provided investment advice or any other advice to FGL or any annuitant. The Index Parties are not the issuer of the Products. Purchasers of the Products neither acquire an interest in the Index nor enter into any relationship of any kind whatsoever with the Index Parties.

No Index Party has passed on the legality or suitability of, or the accuracy or adequacy of the descriptions and disclosures relating to, any Product, including those disclosures with respect to the Index. The Index Parties make no representation whatsoever, whether express or implied, as to the advisability of purchasing, selling or holding any product linked to the Index, including the Products, or the ability of the Index to meet its stated objectives, including meeting its target volatility. The Index Parties have no obligation to, and will not, take the needs of FGL or any annuitant into consideration in determining, composing or calculating the Index. The selection of the Index as a crediting option under the Products does not obligate FGL to invest annuity premiums in the components of the Index.

THE INDEX PARTIES MAKE NO REPRESENTATION OR WARRANTY WHATSOEVER, WHETHER EXPRESS OR IMPLIED, REGARDING THE INDEX, ITS DEVELOPMENT AND HAVE NO RESPONSIBILITIES, OBLIGATIONS OR LIABILITIES WITH RESPECT TO ITS INCEPTION, ADJUSTMENT, MAINTENANCE, OPERATION OR CALCULATION. AND HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES (INCLUDING, WITHOUT LIMITATION, THOSE OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE OR THE ADVISABILITY OF ANY PERSON PURCHASING ANY PRODUCT), WITH RESPECT TO THE INDEX OR ANY DATA INCLUDED THEREIN OR RELATING THERETO, AND IN PARTICULAR DISCLAIM ANY GUARANTEE OR WARRANTY AND SHALL HAVE NO LIABILITY AS TO THE QUALITY, ACCURACY, ADEQUACY, TIMELINESS, COMPLETENESS OR AVAILABILITY OF THE INDEX OR ANY DATA INCLUDED THEREIN, THE RESULTS OBTAINED FROM THE USE OF THE INDEX AND/OR THE COMPOSITION OF THE INDEX AT ANY PARTICULAR TIME ON ANY PARTICULAR DATE OR OTHERWISE. THE INDEX PARTIES SHALL NOT BE LIABLE (WHETHER IN NEGLIGENCE OR OTHERWISE) TO ANY PERSON FOR ANY ERROR OR OMISSION IN THE INDEX OR IN THE CALCULATION OF THE INDEX, AND THE INDEX PARTIES ARE UNDER NO OBLIGATION TO ADVISE ANY PERSON OF ANY ERROR THEREIN, OR FOR ANY INTERRUPTION IN THE CALCULATION OF THE INDEX. NO INDEX PARTY SHALL HAVE ANY LIABILITY TO ANY PARTY FOR ANY ACT OR FAILURE TO ACT BY THE INDEX PARTIES IN CONNECTION WITH THE DETERMINATION, ADJUSTMENT OR MAINTENANCE OF THE INDEX. WITHOUT LIMITING THE FOREGOING, IN NO EVENT SHALL AN INDEX PARTY HAVE ANY LIABILITY FOR ANY DIRECT DAMAGES, LOST PROFITS OR SPECIAL, INCIDENTAL, PUNITIVE, INDIRECT OR CONSEQUENTIAL DAMAGES, EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

No Index Party is a fiduciary or agent of any purchaser, seller or holder of any Product, or has made any representation or warranty, express or implied, regarding the advisability of purchasing, selling or holding any Product or the ability of the Index to track corresponding or relative market performance. No Index Party shall have any liability with respect to any Product in which an interest crediting option is based on the Index, nor for any loss relating to any Product, whether arising directly or indirectly from the use of the Index, its methodology, or otherwise. Any obligation to invest annuity premiums received under the Products are determined solely by FGL.

No purchaser, seller or holder of any Product, or any other person or entity, should use or refer to any trademark or tradename of any Index Party to sponsor, endorse, market or promote any Product without first contacting CIBC. Under no circumstances may any person or entity claim any affiliation with CIBC or any Index Party without the prior written permission of CIBC and such Index Party.

F&G SecureBuilder™ Series — Statement of Understanding

Fidelity & Guaranty Life Insurance Company

BLOOMBERG is a trademark or service mark of Bloomberg. Bloomberg and its affiliates are not affiliated with FGL or CIBC. Bloomberg's association with CIBC is to act as the administrator and calculation agent of the Index, which is the property of CIBC. Bloomberg does not guarantee the timeliness, accurateness, or completeness of any data or information relating to the Index. Bloomberg makes no warranty, express or implied, as to the Index, any data or values relating thereto or any financial product or instrument linked to, using as a component thereof or based on the Index ("Index Products") or results to be obtained therefrom, and expressly disclaims all warranties of merchantability and fitness for a particular purpose with respect thereto. To the maximum extent allowed by law, Bloomberg, its licensors, and its and their respective employees, contractors, agents, suppliers, and vendors shall have no liability or responsibility whatsoever for any injury or damages—whether direct, indirect, consequential, incidental, punitive, or otherwise—arising in connection with the Index, any data or values relating thereto or any Index Products—whether arising from their negligence or otherwise.

In calculating the level of the Index, the index methodology deducts a maintenance fee of 0.85% per year, calculated daily. This fee will reduce the level of the Index and thus the amount of interest, if any, that will be credited to any Product. Furthermore, while the volatility control applied by CIBC may result in less fluctuation in rates of return as compared to indices without volatility controls, it may also reduce the overall rate of return as compared to other indices not subject to volatility controls. For more information on the Balanced Asset 5 index, see indices.cibccm.com/CIBQB05E.

Applicant Acknowledgement Form Instructions:

- 1. Please complete both Acknowledgements attached.**
- 2. The entire Statement of Understanding and one copy of the Acknowledgement are to be retained by the Applicant.**
- 3. The second copy of the Acknowledgement will be sent with the application.**

Applicant Acknowledgement

By signing below, I acknowledge that I have read, or have been read this disclosure form and understand its contents. I have also received and reviewed the information contained in the F&G SecureBuilder Series product brochure. I further understand that I have applied for a Flexible Premium Fixed Indexed Deferred Annuity. In doing so, I have discussed my financial status, tax status, current insurance products and investments (including my financial objectives) with my agent and believe this annuity will assist me in meeting my current financial needs and objectives. I also confirm that I can complete without substantial assistance all six Activities of Daily Living listed within this disclosure form. I also confirm that I have not been diagnosed with a Terminal Illness.

SecureBuilder Surrender Charge Period: ☐ 5-Years ☐ 7-Years
