Let's delve into a hypothetical example that demonstrates how the 15% bonus accelerates your account value in the first year and every subsequent year. For the sake of this example, let's consider a \$100,000 premium over a 10-year duration.

Reignite your \$100,000 with a 15% premium bonus. This could mean an extra **\$24,000** to help jump start your retirement.

This product is offered on a group or individual basis as determined by state approval.

Interest rates subject to change at insurer's discretion and are effective annual or biennial rates.

This product is a deferred, fixed indexed annuity that provides a minimum guaranteed surrender value. You should understand how the minimum guaranteed surrender value is determined before purchasing an annuity contract. Even though contract values may be affected by external indexes, the annuity is not an investment in the stock market and does not participate in any stock, bond or equity investments.

An additional bonus interest rate is paid on this contract. Annuities that offer bonus interest features may have higher fees and charges, longer surrender charge periods, lower credited interest rates and/or lower cap rates than annuities that do not provide the bonus feature.

Indexed interest crediting options are subject to a cap, fixed declared rate, index gain interest rate and/or a spread. Caps, fixed declared rates, index gain interest rate and spreads are subject to change at the discretion of Fidelity & Guaranty Life Insurance Company.

In years when no interest is credited, some indexed interest crediting options or riders may have rider fees deducted, which may decrease the annuity value.

Surrender charges and market value adjustment (MVA) may apply to partial and full surrenders. Surrenders may be taxable and may be subject to penalties prior to age 59 ½.

The provisions, riders and optional additional features of this product have limitations and restrictions, may have additional charges and may not be available in all states.

This hypothetical example is non-guaranteed and is not an indication of the policy's and/or interest crediting option's past or future performance.
