## Death benefit

**Prior withdrawals reduce benefit amounts.** Interest rates are subject to change. Partial index credit, if applicable, paid up to the date of death.

### Paid as a lump sum, greatest of:

- ▶ Account value
- ▶ Minimum guaranteed surrender value

## Penalty-free partial withdrawals

Each contract year after year 1 may withdraw  $\leq 10\%$  with no surrender charge or Market Value Adjustment (MVA). Withdrawals may be taken as:

- Systematic withdrawals on monthly, quarterly, or semi-annual basis; or
- Up to 4 non-systematic withdrawals per year.

## Surrender charge percentages— for withdrawals in year 1, or withdrawals $> 10\%$ in years 2-7

Contract Year	1	2	3	4	5	6	7	8+
All states	9%	9%	8%	7%	6%	5%	4%	0%

Any time a withdrawal incurs a surrender charge, an MVA will be made. For withdrawals above the annual penalty free withdrawal amount for the purpose of a required minimum distribution, F&G will waive any surrender charges and market value adjustments.

The MVA is based on a formula that takes into account changes in rates since contract issuance. Generally, if rates have risen, the market value adjustment will decrease surrender value; if rates have fallen, it will increase surrender value. MVA does not apply in AK, AL, CT, ID, IL, MN, MO, MS, MT, OR, PA, PR, or WA.

## For unexpected health care costs— access to account value with no surrender charge or MVA

Volatility control seeks to provide smoother returns and mitigate sharp market fluctuations. While this type of strategy can lessen the impact of market downturns, it can also lessen the impact of market upturns, potentially limiting upside potential.
