Death benefit

Paid as a lump sum, greatest of:

- Account value
- Minimum guaranteed surrender value

Spousal continuation may be invoked.

Prior withdrawals reduce benefit amounts. Interest rates are subject to change. Partial index credit, if applicable, paid up to the date of death.

Penalty-free partial withdrawals

Each contract year after year 1 may withdraw $\leq 10\%$ with no surrender charge or Market Value Adjustment (MVA). Withdrawals may be taken as:

- Systematic withdrawals on monthly, quarterly, or semi-annual basis; or
- Up to 4 non-systematic withdrawals per year.

Surrender charge percentages— for withdrawals in year 1, or withdrawals $> 10\%$ in years 2-7

Contract year	1	2	3	4	5	6	7	8+
All states where approved except as noted below (see state approval chart)	9%	9%	8%	7%	6%	5%	4%	0%
IN	10%	9%	8%	7%	6%	5%	4%	0%

Any time a withdrawal incurs a surrender charge, an MVA will be made.

The MVA is based on a formula that takes into account changes in rates since contract issuance. Generally, if rates have risen, the market value adjustment will decrease surrender value; if rates have fallen, it will increase surrender value. MVA does not apply in AK, AL, CT, ID, IL, MN, MO, MS, MT, OR, PA or WA.

Access to account value, with no surrender charge or MVA, for specific health care conditions

In calculating the level of the Balanced Asset 10 index and level of the Balanced Asset 5 index, the index methodology deducts a maintenance

fee of 0.85% per year, calculated daily. This fee will reduce the level of each Index and thus the amount of interest, if any, that will be credited to any Product. Furthermore, while the volatility control applied by CIBC as part of the index methodology may result in less fluctuation in rates of return as compared to indexes without volatility controls, it may also reduce the overall rate of return for products referencing one of the Indexes as compared to other indexes not subject to volatility controls.
