

# Stay-at-home parents need life insurance, too

It's time to shine a light on an often-overlooked segment of our client base—families with a stay-at-home-parent. Here's why they should consider an F&G fixed indexed universal life (FIUL) insurance policy:

**Family first:** Life insurance isn't just for the breadwinners. It's a crucial piece of the puzzle for any family's financial plan.

**Childcare concerns:** When it comes to childcare alone, costs can soar up to \$36,000 per year per child.<sup>1</sup> That's a significant figure for your clients to consider when planning their family's future.

**Full cost:** Think about all the duties a stay-at-home parent handles—from childcare to meal prep and everything in between. When you add it all up, the annual value of these responsibilities can reach a whopping \$133,440!<sup>2</sup> Protecting the value of these contributions can be just as important as protecting a working spouse's income.

## Why F&G FIUL is a great choice

- ✓ **No medical exams for clients under 60** - We help make it easier than ever to get coverage. Underwriting is based on the information on the application along with database checks.<sup>3,4</sup>
- ✓ **Competitive and impactful** - Depending on age and health of the parent, even a modest investment, such as \$50 a month, could provide significant protection for the family.
- ✓ **More than a death benefit** - In addition to providing death benefit protection, our FIUL products provide living benefits—including coverage for critical, chronic and terminal illness.
- ✓ **Tax-advantaged cash accumulation** - Many households with a stay-at-home parent often find their retirement savings to be very one-sided. But with a properly funded F&G FIUL policy, these families can build more balanced cash accumulation and/or potentially enjoy more supplemental retirement income down the road.

<sup>3</sup> Policy approval is determined by a review of medical and personal history on the application and may be subject to additional underwriting requirements at the discretion of F&G. Review Fidelity & Guaranty Life Insurance Company Underwriting Guidelines for additional details.

<sup>4</sup> For applicants who are not U.S. citizens or not permanent resident cardholders, the maximum issue face amount for exam-free underwriting is \$300,000. In Puerto Rico, exam-free underwriting is available for applicants age 0-45 who are applying for less than \$150,000.

# What you need to know

## Non-working spouse

Keep in mind that for “non-working” spouses, the maximum amount of coverage available is \$1,000,000 per primary insured not to exceed the wage earner’s in-force coverage amount. If clients need coverage beyond that, please consult underwriting for individual consideration.

## Consider this scenario:

A 35-year-old male and female, both non-tobacco users, pay \$100 a month in premium. By age 67, they could see non-guaranteed cash values of \$73,000 and \$76,000 respectively.<sup>1</sup>

Policy issuance may be dependent on answers to the health questions on the application.

Surrenders, withdrawals and loans will reduce available death benefit and may be subject to surrender charges. Surrenders and withdrawals beyond basis may be taxable income and subject to penalties if taken prior to age 59 ½. Excessive and unpaid loans will reduce policy values and may cause the policy to lapse. In order to receive favorable tax treatments on distributions made during the lifetime of the insured (including loans), a life insurance policy must satisfy a 7-pay premium limitation during the first seven policy years. A new 7-year limitation will be imposed after certain policy changes. Failure to satisfy this limitation would cause your policy to be considered a Modified Endowment Contract (MEC).

Please review the policy for premium details. If premiums are not paid, as scheduled, your policy may terminate or may increase the likelihood that the surrender value will be insufficient to cover the monthly mortality costs and expense charges unless additional premium is paid.
